

GREEN TIPS: LAUNDRY

Here are some tips for washing laundry in a more sustainable way. Lighten your eco footprint by using these green laundry products, which are manufactured in BC.

Tru Earth products are:

- Ultra-concentrated, hypoallergenic, eco-friendly premeasured strips of liquidless laundry detergent that is tossed into the washing machine.
- Can be used in standard and HE machines.
- Can be used in hot or cold water.
- The cardboard packaging dissolves completely. No longer does one need to purchase detergent in plastic containers eliminating hundreds of millions of plastic jugs from recycling/landfills.
- In addition to using NO plastic, the Eco strips are very light, and as a result, transportation fuel consumption and global warming carbon emissions are dramatically reduced.
- Tru Earth also sells other earth friendly products such as woollen dryer balls, which reduce lint, wrinkles, and static as well as substantially reducing drying time.

Nellie's Laundry Soda is:

- All-natural, super concentrated powder detergent.
- Dissolves quickly in hot or cold water and leaves no residue.
- Phosphate free, scent free, and contains no SLS (sodium lauryl sulphate) or SLS (sodium laureth sulphates).
- Available in a recyclable tin container.
- Nellie's also sells other earth friendly laundry products such as natural stain remover and woollen dryer balls, which reduce lint, wrinkles and static as well as substantially reducing drying time.

Drying time can be reduced by adding a towel to the dryer, or if one has the space, hanging laundry outside, which has the benefit of enhancing freshness.
